

Misha's Vineyard 'Dress Circle' Pinot Gris 2014

93/100 *Pinot Gris Perfection!* A very pure and strongly varietal expression of Pinot Gris with classic pear, lanolin, clove/spice and very subtle nutty flavours. Creamy textured wine with a hint of sweetness although the wine finishes fairly dry. I'm not the world's greatest Pinot Gris fan but this wine knocked my socks off. Drink 2015 - 2019" (**Bob Campbell, MW, -August 2015**).

5 stars ★★★★★ **18.5+/20** "Hand-picked fruit, WBP and cool-fermented in tank with 27% indigenous yeast fermented in seasoned French oak to 13.5% alc. and 7 g/L RS. Brilliant pale straw colour with a suggestion of light gold. The nose is softly full and well-packed with rich aromas of ripe yellow stonefruits, honeysuckle and exotic yellow florals, building in depth with notes of honey, and unfolding a complexing thread of flint and minerals. Off-dry to taste and medium to medium full bodied, the palate features stylishly lush and elegant flavours of ripe yellow stonefruits and pears melded with florals, honeysuckle and minerals. This has delicacy of nuance. The mouthfeel is gently rich with a hint of unctuousness, and is balanced by soft, fine and dry textures, along with soft acidity. The palate is bright and lively, with some underlying alcohol power that carries the wine to a sustained finish with pear notes. This is a stylishly rich, off-dry Pinot Gris with stonefruit, pear and honeysuckle notes. Serve with most white meat dishes and Chinese cuisine over the next 4+ years. 1,257 dozen made. 18.5+/20 Sep 2015." (**Raymond Chan, Raymond Chan Wine Reviews**)

17/20 "A soft and attractive Pinot Gris with rounded edges, no doubt due to barrel fermentation. High level of fruit concentration points to restricted yields. Expect pear and honeydew melon flavours combine with a twist of spice. Medium in body, this is surprisingly fresh and focused for a Pinot Gris. Feb 18, 2015" (**Rebecca Gibb MW**)

"Misha's makes a pinot gris with impressive purity and a texture to die for."
(Bob Campbell, MW)
